

FINAL VERSION @ 15 September 2018

EADPH/SESPO Pre -Congress Workshop on Wednesday, 17 October 2018

The Boundaries between Caries and Periodontal Diseases. What are the Implications for Education in Dental Public Health?

Venue The Centro Cultural Sa Nostra (same conference centre where the EADPH/SESPO Congress will take place) from 09.00 to 15.30.

Background In November 2016 a joint workshop was run by the European Federation of Periodontology (EFP) and European Organisation for Caries Research (ORCA). A series of reviews of the current knowledge on dental caries and periodontal diseases were presented during the workshop and have subsequently been published in the Journal of Clinical Periodontology. In December 2017, guidelines on the expected competencies of a graduating European dentist were published in the European Journal of Dental Education. The guidelines were produced by the Association for Dental Education in Europe (ADEE). These publications provide the latest evidence and raise the question: how can the current knowledge on dental caries and periodontal diseases be incorporated into curricula in dental schools to meet the ADEE guidelines.

Aims The aims of the workshop are therefore to inform participants of the content of the EFP/ORCA position papers on dental caries and periodontal diseases and the ADEE guidelines as they apply to Dental Public Health, to discuss how they may be incorporated into the curricula of dental schools and to produce recommendations accordingly

Overview

The co-author of Domain IV of the guidelines on the competencies of the Graduating European Dentist will summarise the guidelines for this domain and detail the topics relating to dentistry in society which should be included in the undergraduate dental curriculum. Four speakers, who were each members of one of the four groups at the EFP/ORCA workshop, will each give an overview of the content of the papers produce by the group that they took part in and how they may impact on education in Dental Public Health. After the first two presentations there will be small group discussions on the papers and their implications. After the second two presentations there will be further small group discussions. Rapporteurs from each of the small groups will report the recommendations from their small groups in a plenary session. A workshop will conclude with a short presentation on the impact of dental caries and periodontal diseases on general health.

Schedule

09.00	Opening and welcome	Colwyn Jones - President EADPH
09.05	The aims and organisation of the day	Kenneth Eaton - Chair of the workshop
09.10	Competencies of a Graduating Dentist Guidelines for Dental Public Health	Jenny Gallagher- Co-author of ADEE guidelines

- 09.30 Role of microbial biofilms in the maintenance of oral health and the development of dental caries and periodontal diseases Philip Marsh - EFP/ORCS Group 1
- 09.55 Interaction of lifestyle, behaviours or systematic diseases with oral health: dental caries and periodontal diseases. Andreas Schulte - EFP/ORCA Group 2
- 10.20 Small group discussions* on first two presentations
- 11.20 Prevention and control of dental caries and periodontal diseases at individual and population level. Kenneth Eaton- EFP/ORCA Group 3
- 11.45 Age-related effects on oral health, dental caries and periodontal diseases. Jacques Vanobbergen - EFP/ORCA Group 4
12. 10 Small group discussions on final two presentations
- 13.10 Plenary part 1- reports from small groups
- 13.30 Lunch
- 14.30 Plenary part 2 - reports for small groups
- 15.00 Summary and overview Paula Vassallo - President Elect EADPH
- 15.30 Closure of the workshop

* Delegates collect tea/coffee to drink during the small group discussions

Source Documents

Delegates to the workshop will be emailed the consensus reports from the four EFP/ORCA groups were published in the Journal of Clinical Periodontology (JCP) in March 2017, Volume 44, Supplement S18 and the paper Gallagher J., Field J.C .(2017) The Graduating European Dentist - Domain IV: Dentistry in Society. *European Journal of Dental Education*, 21, issue S1, together with recommendations from the EFP for researchers and the oral healthcare team. **Please read these documents before the workshop**

Sponsorship The organisers wish to thank Colgate for funding this workshop. As a result of the company's generosity there is no registration fee and tea, coffee and lunch for delegates is provided at no cost to the delegates.
